☎ (+91) 9022217954 ✉ amitdilipjaiswal191220@gmail.com  [amit-jaiswal-b062811a3](https://www.linkedin.com/in/amit-jaiswal-b062811a3)  [Amit-code-eng](https://github.com/Amit-code-eng)

Education

IIT BHU (Varanasi)

Bachelor of Technology in C.E (CPI: 8.68/10)

July 2019 – June 2023

Varanasi, UP

Technical Skills

Languages: C/C++, Python, Java, JavaScript, SQL, Shell, C#

Web Development: HTML5, CSS3, Bootstrap, ReactJs, NodeJs

Core Subjects: Operating System, Computer Networking, DBMS, OOPs

Developer Tools & Technologies: Git & GitHub, VS Code, Overleaf, MS Office

Experience

VINAYAK REAL ESTATE PROPERTY HUB

May 2022 – July 2022

Python Developer

- Collaboration with Data Management Teams. Created a Python software utilising Open CV and Python libraries.
- Using pyautogui, a webbrowser, and more libraries, automate the sending of Whatsapp messages in bulk.
- Using Click to Chat feature (<https://wa.me/<number>>). It 10X improves Work's effectiveness and performance.
- **Exposures:** Python, Jupyter-lab, Numpy, Pandas, PyAutoGui, webbrowser, etc.

Projects

Path - Finding Visualizer | [GitHub](#) | *BFS, Dijkstra's, A* Search algorithm, HTML, CSS, Javascript*

Dec 2021

- Developed a Pathfinding Visualizer that gives the visual representation of the shortest path from source to destination with some obstacles in a grid using multiple shortest path algorithms.
- Provided users the interface through which they can visualize the shortest path from source to destination through Breadth - First Search, Dijkstra's and A* Search Algorithms which are implemented in Javascript.

Face Mask Detection Alert System | [GitHub](#) | *Python, Jupyter-lab, OpenCV, Support Vector Machine*

Dec 2022

- Explored haarcascade frontalface dataset to detect front face. Collected my own face data with and without mask using camera and stored both datasets using OpenCV.
- Included a Beep alert which will be generated until mask is put on. Applied Machine Learning model i.e Support Vector Machine and achieved an accuracy of 98 % on live data.

Huffman Compression Algorithm | [GitHub](#) | *C++, Data Structure and Algorithms, OOPs, STL*

June 2021

- Huffman coding is a lossless data compression algorithm. Engineered encode to decode and vice versa.
- It follows **Optimal-merge Pattern**, learned various data structure like map, priority queue, classes, greedy algorithm.

Honours And Achievements

Competitive Programming

- Solved over **900 problems** on online Competitive Programming Platforms like Codeforces, geekforgeeks & [Leetcode](#).
- **Codeforces** | **Max Rating** : [Profile](#).
- Rank of 2883 in Google Kick Start Round E, 2021. 1119809 points in Google Hash Code 2022. | [Certificates](#).

Extra-Curricular Activities

- Worked on DrumSpinning Robot in "ROBOWAR" event organized by Technex, **IIT (BHU)**.
- Participated in the HYDRAC'S event organized by Technex, IIT (BHU).
- AOSP/Android Custom Rom/Android Rooting Enthusiast.
